Reșița, 2013

Despre Revistă...

Analele Universității „Eftimie Murgu” Reșița. Fascicola II. Studii Economice, se află la numărul XX, număr aniversar care marchează totodată și o maturizare a rezultatelor științifice cultivate de către această revistă.

De-a lungul timpului, în această revistă au publicat cu succes articole științifice cadrele universitare din domeniul economic din Reșița, Timișoara, Arad și cercetători de prestigiu din țară și străinătate. O dată cu dezvoltarea UEMR, a Facultății de Științe Economice, revista noastră a câștigat în consistență, atât din punct de vedere cantitativ, cât și calitativ. De la an la an, ne-am propus o recenzare din ce în ce mai pertinentă, pe respectarea criteriilor valorice a articolelor publicate în revistă. Recunoașterea a venit treptat, facultatea noastră demarând legături și activități științifice în consorții internaționale și totodată diseminând rezultatele, atât a cadrelor didactice interne, cât și a partenerilor străini prin intermediul revistei, care a câștigat notorietate. Validarea rezultatelor științifice în prezent se realizează de profesori universitari de anvergură internațională, care compun atât Consiliul Științific, cât și Editorial al revistei. Aceștia susțin promovarea unor rezultate științifice de actualitate și de utilitate dovedite pentru economia României și pentru alte economii emergente sau dezvoltate.

About the Journal...

The Annals of „Eftimie Murgu” University Reșița. Fascicle II. Economic Studies, encounters itself at its XX number, anniversary number that celebrates a certain ripening of the scientific results nurtered by this journal.

Along the time, in this journal, have been published scientific papers belonging to the academic researchers from the economic field of Reșița, Timișoara, Arad, as well as well- known researchers from all over Romania and abroad. Once with the process of development of the UEMR, of the Faculty of Economic Sciences, our journal gained in consistency, both in a quantitative and a qualitative way. With each year, we have established a more and more pertinent system of review, in accordance with the valoric criteria of the papers published in the journal. The recognition came gradually, with the development of scientific connections and common activities that took place in the international consortium that our faculty accomplished and in the same time, with the dissemination of results, that came from reasearchers from inside the country and from abroad. Currently, the validation of the scientific papers is realized by proffesors with a high international reputation, that are part of the Editorial board or of the Scientifical Commitee. They are interested in promoting current and useful scientific results, both for the Romanian economy and for other emergent or developed economies.
