Despre Revistă...

Analele Universității „Eftimie Murgu” Reșița (UEMR), Fascicola Studii Economice, se află la numărul XIX, număr aniversar care marchează totodată și o maturizare a rezultatelor științifice cultivate de către această revistă.

De-a lungul timpului, în Analele UEMR, Fascicola Studii Economice, au publicat cu succes articole științifice cadrele universitare din domeniul economic din Reșița, Timișoara, Arad și cercetători de prestigiu din țară și străinătate. O dată cu dezvoltarea UEMR, a Facultății de Științe Economice și Administrative, revista noastră a câștigat în consistență, atât din punct de vedere cantitativ, cât și calitativ. De la an la an, ne-am propus o recenzare din ce în ce mai pertinentă, pe respectarea criteriilor valorice a articolelor publicate în Analele UEMR, Studii Economice. Recunoașterea a venit treptat, facultatea noastră demarând legături și activități științifice în consorții internaționale și totodată diseminând rezultatele, atât a cadrelor didactice interne, cât și a partenerilor străini prin intermediul revistei, care a câștigat notorietate. Validarea rezultatelor științifice în prezent se realizează de profesori universitari de anvergură internațională, care compun atât Consiliul Științific, cât și Editorial al revistei. Aceștia susțin promovarea unor rezultate științifice de actualitate și de utilitate dovedite pentru economia României și pentru alte economii emergente sau dezvoltate.

-COMITETUL DE REDACȚIE-

About the Journal...

The Annals of „Eftimie Murgu” University Reșița (UEMR), Economic Studies Fascicle, encounters itself at its XIX number, anniversary number that celebrates a certain ripening of the scientific results nurtured by this journal.

Along the time, in the UEMR Annals, Economic Studies Fascicle, have been published scientific papers belonging to the academic researchers from the economic field of Reșița, Timișoara, Arad, as well as well-known researchers from all over Romania and abroad. Once with the process of development of the UEMR, of the Economics and Administrative Studies Faculty, our journal gained in consistency, both in a quantitative and a qualitative way. With each year, we have established a more and more pertinent system of review, in accordance with the valoric criteria of the papers published in the Economic Studies Fascicle, The UEMR Annals. The recognition came gradually, with the development of scientific connections and common activities that took place in the international consortium that our faculty accomplished and in the same time, with the dissemination of results, that came from researchers from inside the country and from abroad. Currently, the validation of the scientific papers is realized by professors with a high international reputation, that are part of the Editorial board or of the Scientific Committee. They are interested in promoting current and useful scientific results, both for the Romanian economy and for other emergent or developed economies.
